

Work offers in Psychiatry in Sweden

Hospital 1, South-East-Sweden:

The Psychiatric Department is offering employment for a specialist doctor in general adult psychiatry. The hospital covers approximately 96 000 inhabitants. It has 250 employees, of which 15-20 are specialist doctors. The psychiatrist will work in a multidisciplinary team, both in inpatient and outpatient care. The work includes reception, diagnosis and treatment of patients, team sessions, meetings with the patient's relatives, and cooperation with community, employment and insurance services. There are duties during nights and weekends.

The doctor will also have teaching activities, and will be asked to participate in the training of younger colleagues and residents.

The interest in research activities such as the ADHD disorder is desirable.

Hospital 2, South-West-Sweden:

The principal catchment area is of approx. 120000 people.

The department consists of two parts, inpatient and outpatient. There are four nursing wards, one for psychosis, one for addiction disorders and two for general psychiatry. The most common diagnosis at the clinics are affective disorders, OCD, PD, social phobia and eating disorders.

The Hospital has a generous policy regarding further training and participation to conferences.

Hospital 3, South-West-Sweden, Affective and addiction psychiatry:

The hospital offers four positions for adult psychiatrist. The positions are in the Affective Psychiatry Department (2 positions) and in the Addiction Department (2 positions).

The doctor will work in a multidisciplinary team, in both inpatient and outpatient work. The work includes reception, diagnosis and treatment of patients, team sessions and meetings with the patient's family, cooperation with social services.

In the affective psychiatry clinic they treat patients with affective disorders, including bipolar disorders, anxiety syndroms, compulsive-, eating-, personality-, neuropsychiatric disorders including ADHD and autism spectrum disorder. They have several programs for adapting people to the society, as these patients often have a hard time adjusting.

The Hospital has a generous policy regarding further training and participation to conferences. The doctor will also be involved in the training of resident doctors and in the further development of the department.

Hospital 4, Central-Sweden:

The hospital offers three vacancies for specialist doctors in adult psychiatry, one in the inpatient department and two in the outpatient department.

A wide type of psychiatric disorders are treated by the two clinics, such as affective disorders, psychotic disorders, anxiety disorders, ADHD in adults, personality disorders and certain types of addictions. The patients who have schizophrenia or schizophrenia related disorders are not treated in these clinics.

The work is done in multidisciplinary teams, with psychologist, nurse, therapist and social worker, taking into account the patient's entire situation (psychiatric, medical, social).

The inpatient department has short treatment durations and a large turnover of patients. Average length of stay is 12-15 days and on average there are two new patients per day. The inpatient department has 20 beds, the department is coordinated by two specialist doctors and usually 2-4 specialist psychiatrists. The department has continually doctors in training, that is why mentoring is a natural part of the work. The candidate is expected to have an active role in the department's medical development.

Doctors are expected to have at least 5 patients per day. The rest of the time includes supervision of younger colleagues, meetings and participation in the development of the department.

The specialists perform the most specific medical tasks such as diagnostics, drug treatment and they establish the plan of treatment together with the team.

Hospital 5, South-Sweden, Forensic psychiatry:

A hospital in the South of Sweden offers a position for a specialist doctor in psychiatry with experience or interest in forensic psychiatry.

The mission is to ensure civil security through a highly specialized forensic psychiatric care. The clinic treats mainly people who committed crimes under the influence of a serious mental disorder and therefore cannot be sentenced to prison. But even patients from correctional psychiatric care can be received at the clinic, as well as in exceptional cases, patients whose needs can not be met within general psychiatry.

The clinic conducts highly specialized psychiatric care throughout the continuum of care - from inpatient care in Safety Class 2 and 3 to less closed shapes as halfway houses and aftercare in the form of open psychiatric care.

In addition to traditional medical treatment based care at a psychosocial approach and the Environment therapeutic principles. Occupational therapy and educational activities are important aspects of healthcare. Work at the clinic are conducted in interdisciplinary teams. Based on each patient's needs, teams can consist of physicians psychologist, social worker, occupational therapist, nurse and attendant. Other important groups in the clinic, for example, trainers in occupational and engineering as well as teachers.

The clinic has about 160 employees and 72 hospital beds.

The clinic conducts research in three main areas - nursing, risk and hazard assessment and social care processes.

The candidate should have either experience in forensic psychiatry or interest.
